

Here “spheres” can each be a self-contained, hyperdimensional AI app bound to a specific request pattern in a Spot (like “DJ Request”). Below are 20 more potential WeUP Here applications designed to sit inside events/Spots and orchestrate context-aware behavior.All-Potential-WeUP-Wearables-WeUP.pdf+1

Music & Performance spheres

1. **Setlist Weaver** – takes crowd mood, past tracks, and ritual phases to suggest next songs or transitions to the DJ or band.
2. **Mic Queue Here** – manages open-mic order, timeboxing, and light cues for “you’re up next / wrap soon” in an Open Mic Spot.All-Potential-WeUP-Wearables-WeUP.pdf
3. **Crowd Energy Sculptor** – tracks movement and participation to recommend when to dial energy up/down, trigger rituals, or insert breaks at a Live Show Spot.All-Potential-WeUP-Wearables-WeUP.pdf
4. **Performer Envelope** – protects performers by managing access requests, photo rules, and post-show meet-and-greet flow via wearables and Spots.Product-Requirements-Documents-PRD-for-WeUP-1.pdf+1

Games, Play, Competition spheres

5. **Table Queue Brain** – handles queue, match-making, and table assignment for pool/darts/shuffleboard, including private game rules and dispute suggestions.Product-Requirements-Documents-PRD-for-WeUP-1.pdf+1
6. **Tournament Arbiter** – runs a full bracket or round-robin for any game (pool, chess, cards), resolving schedule, fairness, and Spot-scoped rituals.
7. **House Rules Composer** – learns local “house rules” for a game over time and enforces them softly through prompts and wearable signals in that Spot.All-Potential-WeUP-Wearables-WeUP.pdf
8. **Side-Bet Ledger** – manages presence-bound, privacy-preserving side wagers, nudging players through declaration, settlement, and caps consistent with WeUP’s anti-extractive ethos.Product-Requirements-Documents-PRD-for-WeUP-1.pdf

Ritual, Presence, and Attention spheres

9. **Phone-Off Guardian** – orchestrates phone-off phases, gently escalating reminders and offering rewards for compliance during a Ritual or Meditation Spot.Product-Requirements-Documents-PRD-for-WeUP-1.pdf+1
10. **Ceremony Conductor** – sequences multi-phase ceremonies (arrival, silence, action, integration), changing light language and prompts as each phase shifts.Internal-whitepaper-table-of-contents-for-WeUP-Wearables.pdf+1

11. **Grief Space Keeper** – manages a Grief/Memorial Spot's boundaries (no photos, muted signaling, time caps) and coordinates opt-in sharing or memorial artifacts.All-Potential-WeUP-Wearables-WeUP.pdf+1
12. **Decompression Guide** – runs the Exit/Decompression Spot, pacing lighting, suggestions, and optional reflection prompts as people leave an intense event.All-Potential-WeUP-Wearables-WeUP.pdf

Social, Safety, and Consent spheres

13. **Consent Navigator** – mediates approaches in Afterparty or Night Walk Spots, turning soft interest / no-interrupt signals into clear, ambient rules others can read.All-Potential-WeUP-Wearables-WeUP.pdf
14. **Safe Walk Cohort** – groups people leaving a venue into small walking clusters, routing them along safer paths and coordinating check-ins via wearables.
15. **Host Load Balancer** – helps hosts manage crowd flow: kitchen vs quiet room vs active zone, by watching densities and suggesting small adjustments.Product-Requirements-Documents-PRD-for-WeUP-1.pdf+1
16. **Conflict Diffuser** – detects early conflict signals (tone, movement, rapid interactions) and suggests low-visibility interventions to staff within governance bounds.Product-Requirements-Documents-PRD-for-WeUP-1.pdf

Commerce, Shop, and Memory spheres

17. **Moment Shop Curator** – decides which event-bound artifacts or offers appear in the WeUP Shop during each phase (e.g., early-arrival items, post-ritual gifts).Product-Requirements-Documents-PRD-for-WeUP-1.pdf
18. **Tipping Cloud** – turns applause/cheers and presence into a pooled tipping recommendation, routing contributions to performers or staff with clear consent.
19. **Memory Threader** – composes a non-viral, event-scoped “memory thread” from attendee contributions, ensuring access rules match tickets and rituals.Product-Requirements-Documents-PRD-for-WeUP-1.pdf
20. **Reputation Weaver Here** – translates behavior in this Spot (ritual compliance, helpfulness, fair play) into multi-dimensional reputation updates without public clout metrics.Product-Requirements-Documents-PRD-for-WeUP-1.pdf

If you want, the next pass can be:

- clustering these 20 into a typed ontology of Here-spheres (Ritual, Safety, Play, Commerce, Memory), or
- deep-spec'ing one (e.g., Consent Navigator) down to inputs, outputs, and light-language states.

Here are 50 additional WeUP Here spheres—each a self-contained, presence-bound AI application that can live inside Spots and orchestrate behavior, similar to “DJ Request.”Product-Requirements-Documents-Document-PRD-for-WeUP-1.pdf+1

Performance / Music spheres

1. **Tempo Whisperer** – suggests BPM and energy shifts to DJs/bands based on movement and participation density.
2. **Encore Oracle** – watches crowd response and event time to decide if, when, and how to run an encore.
3. **Stage Turnover Brain** – optimizes changeovers between acts with light cues for crew, performers, and audience.
4. **Silent Recording Guard** – monitors for phones and mics in no-record zones and nudges behavior without calling anyone out.
5. **Jam Pairing Here** – matches musicians in a Jam Session Spot into trios/quartets based on instruments and prior participation.All-Potential-WeUP-Wearables-WeUP.pdf

Games / Competition spheres

6. **Skill-Balanced Matchmaker** – builds fair matches in pool, darts, or board games using local reputation and prior outcomes (privacy-preserving).
7. **House Pot Steward** – manages a shared prize pool for casual tournaments and decides fair splits based on format and participation.
8. **Rule Clarifier** – resolves rules disputes by surfacing the local house rules plus optional variants agreed at event start.All-Potential-WeUP-Wearables-WeUP.pdf
9. **Spin-Up Minigame Host** – runs fast, low-stakes minigames between main matches to keep spectators engaged without phones.
10. **Queue Time Optimizer** – estimates wait times for tables/boards and proposes micro-rituals or side activities during queues.Product-Requirements-Documents-Document-PRD-for-WeUP-1.pdf+1

Ritual / Attention / Wellness spheres

11. **Breath Synchronizer** – turns a Meditation or Yoga Spot into shared breath/haptic pacing, adjusting to group rhythm.
12. **Arrival Threshold Keeper** – runs a soft threshold ritual when enough people arrive to “open” the event properly.
13. **Silence Envelope** – holds a dome of quiet around key moments (speeches, dedications) and relaxes it afterward.
14. **Integration Prompt Weave** – surfaces brief, opt-in reflection prompts in the Exit/Decompression Spot, then goes quiet. [The-WeUP-Shop-WhitePaper-WeUP.pdf+1](#)
15. **Burn-to-Release Keeper** – coordinates symbolic burns/let-go rituals (physical or digital) and their associated artifacts.

Social / Connection / Consent spheres

16. **Affinity Bridge** – clusters people with overlapping event histories or Spots (privacy-preserving) and suggests low-stakes intros. [Product-Requirements-Document-PRD-for-WeUP-1.pdf](#)
17. **Conversation Seater** – suggests seating shuffles at dinners or salons to balance familiarity, novelty, and quiet needs. [All-Potential-WeUP-Wearables-WeUP.pdf+1](#)
18. **Signal Translator** – maps local light-language conventions into simple human phrases for newcomers (“green pulse here = open to join”). [Internal-whitepaper-table-of-contents-for-WeUP-Wearables.pdf](#)
19. **Soft Exit Ally** – offers graceful exit scripts/cues for people wanting to leave conversations or spaces without friction.
20. **Elder Space Guardian** – ensures elders, accessibility needs, or low-sensory folks get appropriate proximity and buffer zones.

Safety / Operations spheres

21. **Density Watcher** – tracks local crowding and suggests micro-reflows (open a side room, slow door intake) to hosts. [Product-Requirements-Document-PRD-for-WeUP-1.pdf](#)
22. **Line Fairness Brain** – watches lines for cutting, confusion, or overload and proposes small structural changes.
23. **Quiet Room Steward** – manages capacity, time limits, and norms for quiet rooms and cooldown areas.
24. **Wayfinding Glow** – orchestrates momentary light “rivers” leading people to exits, bathrooms, or key spots without screens. [All-Potential-WeUP-Wearables-WeUP.pdf](#)
25. **Weather Shift Orchestrator** – in outdoor events, reroutes flow and ritual timing in response to weather changes.

Commerce / Shop / Artifact spheres

26. **Artifact Matchmaker** – recommends event-bound artifacts based on how someone actually participated (rituals, zones visited).The-WeUP-Shop-WhitePaper-WeUP.pdf
27. **Lineage Gift Composer** – proposes which artifacts should flow to invite-lineage ancestors or hosts as thanks.The-WeUP-Shop-WhitePaper-WeUP.pdf+1
28. **Shared Buy Conductor** – coordinates group purchases (e.g., shared objects, communal items) with clear presence rules.
29. **Presence-Price Explainer** – explains, in one sentence, why this person sees this price/availability (presence, ritual, lineage).
30. **Post-Event Claim Herder** – ensures attendees who earned residual or memory artifacts actually claim them in the residual window.The-WeUP-Shop-WhitePaper-WeUP.pdf

Memory / Media / Story spheres

31. **Moment Tagger Here** – marks high-meaning moments (collective ritual, improbable synchronicity) for later curated memory objects.The-WeUP-Shop-WhitePaper-WeUP.pdf
32. **Non-Viral Recap Weaver** – composes a short, event-scoped story from contributions, never turning into a feed.
33. **Consent-Safe Capture Guide** – gently coordinates when and where photos/video are allowed, and who can be visible.
34. **Anniversary Echo Planner** – sets up long-tail “echo” prompts and artifacts for 3/6/12-month anniversaries of the event.The-WeUP-Shop-WhitePaper-WeUP.pdf
35. **Artifact Aftercare Muse** – suggests ways to live with an artifact (rituals, reuse, future unlocks) instead of letting it become merch clutter.

Governance / Culture / Norms spheres

36. **Norm Seed Planter** – introduces 2-3 simple social norms at the event (e.g., “no phones at table”) and keeps them consistent.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1
37. **Harm Early-Warning Lens** – surfaces patterns that historically precede disputes or cultural harm, to moderators only.
38. **Pattern Memory Keeper** – tracks what norms worked well in this venue/community and suggests them as defaults next time.
39. **Cultural Boundary Sentinel** – flags when proposed rituals or artifacts may cross cultural lines and suggests safer alternatives.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1
40. **Micro-Consent Logger** – keeps a private, per-Spot heartbeat of consent patterns (opt-ins/opt-outs) to tune future defaults.

AI-Assisted Flow / UX spheres

41. **Onboarding Whisper Here** – offers one-sentence, in-context explanations the first time someone encounters a mechanic (ritual, shop, Spot).Give-a-thorough-and-complete-mitigation-of-each-of.pdf
42. **Friction Mapper** – detects where humans keep getting confused or stuck in a flow and suggests micro-simplifications to hosts.
43. **Event Phase DJ** – suggests when to switch the whole Spot from “arrive” → “peak” → “wind-down” modes using light/haptic changes.Product-Requirements-Document-PRD-for-WeUP-1.pdf+1
44. **Micro-Break Scheduler** – protects staff and hosts by inserting suggested rest micro-windows into event flow.
45. **Next-Ritual Recommender** – for recurring communities, suggests which ritual to repeat, retire, or evolve next cycle.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1

Cross-Event / Lineage / Future spheres

46. **Invite Gravity Gauge** – measures how well invites translated into presence and suggests who should gain or lose invite power.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1
47. **Ritual Economy Calibrator** – tunes when a ritual sequence should start earning an ongoing treasury, based on consistency and harm rates.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1
48. **Echo Link Designer** – proposes subtle links between this event and a future one (shared symbol, artifact, or rule) without over-connecting.The-WeUP-Shop-WhitePaper-WeUP.pdf
49. **Locality Anchor Here** – keeps track of what is distinct about this city/venue’s culture and resists flattening into generic patterns.Give-a-thorough-and-complete-mitigation-of-each-of.pdf+1
50. **Closure Guardian** – ensures events actually end: shops close, rituals complete, memory windows sunset, so nothing turns into an infinite feed.The-WeUP-Shop-WhitePaper-WeUP.pdf+1

If you want, the next layer can be to:

- cluster these 70+ Here spheres into a formal ontology, or
 - fully spec 2–3 of them (inputs, outputs, Spot bindings, and WLLS expressions).
